

Equipment Design

Pregis IntelliPack foam-in-place systems were created with the operator in mind. The equipment, parts and accessories design optimizes ergonomics, ease of use and productivity.

Ergonomic SmartFILM™

- Easy-to-thread SmartFILM™ with quick access to loading spindle
- Roll locks into operating position and easily unlatches
- DC motor monitors film usage to adjust film tension and shut off machine when out of SmartFILM™

Rugged Mixing Module

- Most horsepower available
- Continuously replenished SmartLUBE™ supply
- Zero maintenance expense
- Lifetime warranty

User Friendly Bag Maker

- Convenient, front location
- Large, easy-to-push buttons
- Programmable

User friendly Hand-Held Dispenser

- Allows for flexible mounting options
- Tapered dispenser allows more precise dispensing
- Insulated handle stays cool

Easy to Replace Sealing Wires

- Plug-in design installs in five seconds
- Advanced temperature control software extends wire life
- Lifetime warranty

Advanced Software

- Controls seal and cut wire temperatures
- Extends wire life
- Delivers perfect seal and cut, every time
- Eliminates warm-up time
- Eliminates carbon and polyfoam build up on sealing jaws

Lightweight Chemical Pumps

- State-of-the-art brushless motors and controls to run 10-times longer.
- Barrel pump available for drums and a longer pump for totes
